

## The Balanced-Income Focus Portfolio

### Portfolio Objective:

The primary objective of the Balanced-Income Focus portfolio is to invest in a portfolio of both bonds and equities with an emphasis on returns earned through income generation via interest and dividends. There will be some risk to capital.

### Investment Advisor:

The Investment Advisor is RBC Investment Management (Caribbean) Limited. The Investment Advisor provides advice on portfolio allocation, ETF selection and portfolio rebalancing.

### Portfolio Strategy:

The strategy provides a diversified and balanced exposure to USD-denominated bonds and equities using Exchange Traded Funds (ETFs). The selection of ETFs will be based on the instrument's income generation: such as for bonds, the focus will be on high yielding securities that may not be Investment Grade. Securities that are not Investment Grade are referred to as "junk" bonds because they are considered lower in credit quality. This lower credit quality is compensated by higher yields. Equities will focus on securities that have consistently paid above average dividends.

### Target Portfolio Allocation:

High Yield Bonds	30%
LT US Corporate Bonds	10%
Emerging Market Bonds	10%
US REITS	20%
US Equities - Dividend Focus	30%

### Target Portfolio Holdings:

ETF Name	Allocation
SPDR Bloomberg Barclays High Yield Bond	30%
Vanguard Long Term Corporate Bond	10%
iShares JP Morgan USD Emerging Market Bond	10%
SPDR Dow Jones REIT	20%
SPDR S&P Dividend	30%

### Average Annualised Return:

Returns to Mar 31, 2023	1 Year	3 Year	5 Year	10 Year
Balanced - Income Focus Portfolio	-7.5%	9.0%	4.4%	5.4%
Benchmark	-7.4%	9.3%	4.7%	5.9%

These returns do not include fees

### Historical Return to March 31, 2023:

### Who should invest?

Investors seeking higher returns and those who can withstand a moderate level of risk. There is risk to capital, however, over the long-term this portfolio should outperform deposits and other short-term instruments. It is recommended investors have an investment time horizon of at least 5 years.

### Market Outlook:

The U.S. Federal Reserve continued its' tightening policy but scaled down the magnitude by increasing only 25 bps in May and March 2023 after a 50 bps increase in December 2022 and 75 bps in November 2022. The reduced pace was warranted based on the slowdown in inflation as the Consumer Price Index fell to 5% y-o-y in March 2023, after reaching a peak of 9.1% in June. The economic slowdown in the U.S. is becoming more evident with the Q1 GDP coming in at a paltry 1.1%

pace and a recession in late 2023 is widely expected.

The S&P 500 was up 7.03% in Q1 2023 after a 7.08% advance in Q4 2022. While inflation is retreating, recession fears continue, bolstered by bank failures over the quarter and uncertainties over tight credit and declining system liquidity. Labour markets continue to be strong, with unemployment at 3.4% in April and overall job creation still positive, despite many companies implementing job cuts.
